

## 2018 HISTORICAL PRODUCT CONTENT LABEL<sup>1</sup>

Pure Wind is a Renewable Energy Certificate (REC) product and does not contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. For more information, see Green-e's webpage containing Long REC Disclosure language: [www.green-e.org/rec](http://www.green-e.org/rec).

Pure Wind matches 50% or 100% of your electricity usage, specific information is available in your welcome packet.

In 2018, Pure Wind was made up of the following renewable resources.

Green-e Energy Certified New <sup>2</sup> Renewables in Pure Wind		Generation Location
-Biomass	%	
-Geothermal	%	
-Hydroelectric <sup>3</sup>	%	
-Solar	%	
-Wind	100%	Oklahoma
<b>TOTAL</b>	<b>100%</b>	<b>Oklahoma</b>

1. These figures reflect the resource mix of the RECs delivered to Pure Wind's customers in 2018. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the RECs you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying the United States includes: Natural Gas (35.1%), Coal (27.4%), Nuclear (19.3%), Renewable (17.1%), and Other (0.3%). [Source U.S. EIA, 2018]

The average home the United States uses 867 kWh per month. [Source: U.S. EIA, 2017]
